Reading the chapter is not the same as writing the paper.

Most students in Class 10 know the syllabus. What they have not done enough of is **answering questions under a clock**, seeing where the marks actually go, and finding out which chapter is weak *before* the board exam finds out for them.

TestSaathi is built for exactly that gap — the distance between knowing a chapter and being able to write it. That is the whole idea behind the line we put on the cover: **board se pehle, board jaisa**. Practice that feels like the paper, while there is still time to fix what it shows you.

WHAT'S INSIDE

1

Practice Mode

Learn at your own pace. Fresh questions every session, with an explanation after each one.

2

Real Exam Mode & Board Papers

Build a paper from your chapters, or attempt a real CBSE board paper — timed, and marked the moment you submit.

3

AI Tutor

Stuck at 11 p.m.? Photograph the question or type it, and get the steps — not just the answer.

Practice Mode

No timer, no pressure. Choose a chapter, choose how hard you want it, and work through questions until the concept stops feeling slippery.

- **Chapter-wise, with difficulty filters.** Start where you actually are, not where the book starts.
- **Instant feedback after every answer.** You find out immediately, while the question is still in your head.
- **Step-by-step explanations.** Written in simple language — the reasoning, not just the correct option.
- **A no-repeat engine.** Every session brings questions you have not seen before, so practice never turns into memorising a fixed set.
- **Bookmark anything.** Build your own revision list and come back to it the week before the exam.

THE POINT

A question you got wrong and then understood is worth more than ten you got right. Practice Mode is where that happens — quietly, before it costs you marks.

Real Exam Mode

The other half of preparation: sitting down, starting a clock, and finding out what you can do without the book open.

- **Build your own paper.** Pick the chapters; the paper is assembled from them.
- **A live countdown, and auto-submit.** Exactly the pressure of the real hall.
- **Randomised selection.** Two attempts at the same chapters are never the same paper.
- **Score and accuracy the moment you submit.** No waiting, no guessing.

PREVIOUS YEAR QUESTIONS

Real board papers, under real conditions.

Actual CBSE Class 10 board papers, attempted in exam mode with the original time limit and the original marks. The closest thing to the exam that is not the exam.

Stuck on a question?

Doubts do not wait for the next class. Two ways to clear one, both inside the app.

Scan & Solve

Photograph the question.

From the textbook, from a worksheet, from the board — upload the photo and get the solution worked through, step by step.

AI Chat Tutor

Or simply ask.

Type the doubt in your own words, at any hour, and keep asking until the concept is clear. It explains; it does not just announce the answer.

Maths, Science and Social Science. Every student gets free tries to see whether it helps before deciding anything.

A student who cannot get a doubt cleared usually does the same thing: skips the question, and then skips the chapter. This is there so that the skipping stops.

Know exactly where you stand.

A score on its own tells you very little. What changes preparation is knowing **which chapter** the marks are leaking from.

- **Chapter-wise performance.** Strong chapters and weak ones, separated and named.
 - **Accuracy, not just totals.** Where you are guessing shows up clearly.
 - **Your weak areas, revisited.** Go straight back into practice on the chapters that need it.
 - **A leaderboard.** See where you stand among other students preparing right now.
-

NOT ONLY FOR STUDENTS

For parents

Link your child's account and see the practice and exam progress yourself — without having to ask every evening.

For teachers

Create a classroom, add your students, schedule live exams and review each student's attempt.

Give a whole section the practice it needs.

Setting question papers, marking them and working out which chapter a class is weak in takes a teacher most of a weekend. TestSaathi does that part, so the teaching time goes back to teaching.

- **A classroom for each section.** Add students once; everything after that is in one place.
- **Schedule a live exam.** The whole section attempts the same paper at the same time, on their own phones.
- **Marked automatically.** Results are ready the moment the clock stops.
- **Chapter-wise view of the class.** See which chapter to reteach before the pre-boards, not after.
- **Nothing to install.** It runs in a browser, on any phone the student already has.

TALK TO US

Arrange a walkthrough for your staff room.

We will set up a classroom with your section and show your teachers how it works — message us on WhatsApp or write to us.
